

Since 1923 Pneumofore has designed and produced Rotary Vane compressors and vacuum pumps featuring original solutions, the result of constant efforts in Research and Development.

The K Series gas compressor systems are the solution for gas treatment and processing applications that need high energy savings, low operational cost and constant efficiency over decades.

With 1.5 to 10 bar(g) pressure range and up to 2560 m<sup>3</sup>/h, the K Series covers the gas compression requirements in many industries. The high-quality, sturdy design of these systems meets the most stringent safety criteria for hazardous events or situations related to the process.

Pneumofore Rotary Vane technology, which is at the core of the K Series, ensures trouble-free operation, stable performance over the years and the lowest Life Cycle Cost available on the market. The K Series gas compressor systems are lubricated by means of a closed oil circuit.

Mod. K180

## Main Features

Pressure Outlet	1.5 to 10 bar(g)
Nominal Power	up to 200 kW
Gas Group	IIA
Cooling system	Water or air
Certification	CE  Atex, EN 1012-3

## Optional Features

Variable Speed to manage any variation of flow request
Skid-mounted or sound-proof enclosure
Off-skid electrical panel
On-board monitoring
Extra accessories such as inlet and outlet filters

## Highlights

- Low noise level and low vibrations
- Low rotation speed for maximum longevity
- Heavy-duty design for continuous operation 24/7
- All-included accessories available on skid
- Certified for extreme and explosive environments
- Engineering support
- Simple design for ease of maintenance
- Constant efficiency within the speed range

## Rotary Vane Compressors

- Single-stage outlet pressure of 1.5 to 10 bar(g)
- Non-consumable vanes made of aluminium alloy
- Active sealing for constant machine performance
- Direct Coupling for no transmission loss
- Two bearings only
- Few moving parts for maximum reliability
- Constant pressure with Variable Speed drive
- Lowest Life Cycle Cost

## Industries

Oil & Gas
Chemical process
Electronics manufacturing
Metal industry
Natural gas and energy sector
Food processing
Pharma
Biotech
LNG and more

## List of Gases

Methan	CH <sub>4</sub>
Ethane	C <sub>2</sub> H <sub>6</sub>
Carbon dioxide	CO <sub>2</sub>
Nitrogen	N <sub>2</sub>
Biogas	
Natural gas	
Volatile organic compounds (VOCs)	

Each K Series system is designed according to the gas composition
